Subject: Microsoft Settlement

Dear Sir:

I am a happy Apple customer. I work in the public schools using IMac's. Over the years I have seen the increasing domination of the computer industry by Microsoft. When I read the proposed settlement, I was outraged that such a settlement was even being considered. Microsoft is monopolistic. If it can get away with "giving" schools old computers that only run Windows, it will be the death of the only competitor left out there, Apple. Microsoft needs to be punished for its past practices and not be allowed to continue any of its past predatory practices.
